

MM21 DHC installs two absorption chillers.

MM21 DHC installed additional two absorption chillers (3,000RT and 2,000RT) at No. 2 Plant.

MM21 DHC has been upgrading and expanding its plants in order to keep up with increasing demand for heat as a result of development in the Minato Mirai 21 district. Going forward, MM21 DHC will continue expanding its facilities in line with further development of the Minato Mirai 21 district to ensure improved stability of the heat supply.

Absorption chillers (Top: 3,000RT; bottom: 2,000RT)

Table: Absorption Chiller Specifications for Current Installation

Chilling capacity*	3,000RT	2,000RT
Steam consumption rate (kg/h, RT)	3.59	3.60

* RT is U.S. refrigeration ton (USRT). 1 USRT = 3.517 kW
